GROWN LUPTON BRED

J. M. Lupton & Son, Inc., are seed growers only. We do not deal in anything. While most of our crops are contracted in advance of harvest we plan to have on hand continuously, seasonable stocks of common sorts for the convenience of our customers, but when our crops are exhausted we do not make purchases from other sources and our shipments are always the product of our own tested and selected planting stocks only.

We maintain growing and shipping stations in various parts of the United States and at our headquarters on Long Island we conduct elaborate breeding and testing grounds where every lot of stock seed and its product are systematically tested and checked.

We are invariably willing to render our customers service in expert testing of stocks, in reproducing special stocks and in assistance and advice on catalogue preparation and special problems affecting the lines that we produce.

We feel that many of the problems of the seed trade would be obviated by a more complete and sympathetic understanding between grower and dealer and we urge our customers to call when possible, as we believe such visits well worth while.

We give no warranty express or implied as to description, quality, productiveness or any other matter of any seeds we send out and will not be in any way responsible for the crop.

J. M. LUPTON & SON, INC.
Mattituck, N. Y., U. S. A.

TURNIP

F. O. B. Mt. Vernon, Wash.

	Quantity	Price
WESTERN GROWN SEED	-----	\$1.00
LONG ISLAND SEED	-----	\$5.00

CABBAGE

Western Grown

F. O. B. Mt. Vernon, Wash.

Our Western grown cabbage is produced by ourselves in the State of Washington from the same stock seeds used in planting our Long Island crop, replaced annually from our Long Island breeding farm and is a very high class product. It represents the finest possible stock for the merchant who desires a first quality product at a reasonably competitive price.

COPENHAGEN MARKET

Our strain of this variety is exceptionally uniform and productive.

	Quantity	Price
EXTRA EARLY JERSEY WAKEFIELD	-----	.75
EARLY JERSEY WAKEFIELD		
We have been breeding the Wakefield and the Flat Dutch types for some 40 years. Our production of them is large and we are very confident as to their quality	-----	.75

PREMIUM LATE FLAT DUTCH -----		.75

WESTERN GROWN CABBAGE—Continued

Quantity Price

SHORT STEM DANISH BALL HEAD

We have recently done extensive breeding work in this variety. We believe our strain of it to be exceptionally fine and it has given excellent results in the hands of professional growers90

PENN STATE BALL HEAD

A variety developed by the Division of Plant Breeding of Pennsylvania State College and Experiment Station, which supplies us with stock seed for our plantings. A large, somewhat flattened form of the ball head producing probably the largest tonnage per acre of any known variety of cabbage. Our exclusive production 3.00

LUPTON FLAT SAVOY 1.00

LUPTON ROCK RED

The above two sorts we believe to be the finest of their kind, the only Savoy and Red Cabbage necessary for general purposes. Bred originally for fine market garden trade they are far superior to the average stocks of these sorts 1.00

KALE

F. O. B. Mt. Vernon, Wash.

Quantity Price

BLUE SIBERIAN

A special market garden strain of exceptionally healthy color and bred on Long Island to withstand severe winter conditions20

CURLED SCOTCH

A very dark colored dwarf compact strain densely curled35

YELLOWS RESISTANT CABBAGES

We are confident that the use of the yellows resistant strains of cabbage will gradually increase in demand as the cabbage districts of the Middle West and South are rapidly becoming infested with this disease. We certainly urge all seedsmen supplying these sections to catalogue and feature them. We expect to maintain production and to continue to offer them at a reasonable price. We do not, however, recommend their use in sections where absence of the disease makes it unnecessary, as we have other strains of cabbage more uniform and true to type.

Quantity Price

IACOPE

A new Yellows Resistant strain of Copenhagen Market. A product of ten years' breeding by the Iowa Agricultural Experiment Station. This is the first and only strain of early cabbage on the market that is resistant to the yellows disease. We have the exclusive production of this new strain. Long Island grown----- 2.00

WISCONSIN HOLLANDER or No. 8

A ballhead type cabbage grown in yellows infested sections as a market and storage variety. Western grown ----- 1.00

BUGNER

A drumhead type used largely in the vicinity of Chicago. Western grown ----- 1.00

WISCONSIN ALL SEASONS

Used generally as a Kraut and earlier market sort. Western grown ----- 1.00

LONG ISLAND GROWN CABBAGE

Famous throughout the seed trade for 75 years our Long Island grown cabbage seed is still the finest product possible to obtain. No serious competition at equal prices has ever threatened its position. This is due, we believe, to three factors: First a peculiar climatic and soil condition causing considerable natural selection by the loss of many weaker plants; second, the very high character of the farmers engaged, many of whom have grown seed for us for several generations; and third, the ability and resourcefulness of those who many years ago built up the business.

Sold F. O. B. Mattituck and guaranteed to be of genuine Long Island production, we offer:

	Quantity	Price
EXTRA EARLY JERSEY WAKE-FIELD	-----	1.50
EARLY JERSEY WAKEFIELD	-----	1.50
